TimeTrack-WEB
## Web Based Attendance Management System

Every Organization has its own set of rules and regulations regarding time management, duty timing; leaves rules, holidays, shifts etc. These rules may differ from employee to employee or, for a group of employees. The cumbersome task of manually maintaining the attendance and leaves data and wasting hours and hours on them is now a thing of the past.

TimeTrack-WEB makes maintaining the attendance and leaves data easy, simple and faster by incorporating dynamic masters based on the company's organizational structure; defines various groups to govern late coming, week off,

overtime policies, compensatory off policies, paid holidays and so on. The software is enabled with various features to cut down on the man hours required for the redundant task of maintaining the attendance and leaves data. From the administration of an organization to the senior management; to the employees, everyone can benefit from this software. With its smartly designed features and flexible uses, **TimeTrack-WEB** is the best option available in the market which is cost effective, gives faster ROI and is easy to implement.

TimeTrack-WEB increases efficiency, reduces duplication and also reduces the delays involved due to manual work or using legacy systems.

The main focus of the attendance software is to keep track of the employee attendance and to maintain and provide information that is crucial for other softwares like Payroll, ERP etc
